

Affordable senior housing, open space and parks are far too important to be lost due to inaccurate and misleading arguments from the naysayers.

Please consider the following additional facts before voting:

- **Affordable Senior Housing:** Measures A and B have nothing to do with an urban farm or locally grown organic food. Measures A and B are about providing our seniors with affordable housing so they can remain in the area, close to their family and friends.
- **Extensive Public Process and Planning:** Many options were discussed for this State owned property in over 20 public meetings since 2003. This proposal reflects the community's vision and priorities.
- **State-owned Property:** The State of California owns this piece of valuable property. The state has said in writing that they have no intention of turning this property into an urban farm. If the plan fails, the state would retain the property for other state program and facility needs.
- **Creates Public Open Space:** Today, the property is fenced off, plagued by vandalism and toxic pesticide residues. A YES vote on Measures A and B will create over 3 acres of open space, landscaped gardens and a public park.
- **Toxic clean-up:** A YES vote on Measures A and B will result in the immediate clean up of the property's contaminated areas to meet strict governmental standards.

Join us in voting Yes on A and B – Please don't take away the affordable senior housing, parks and open space that Santa Clara needs so badly.
